**Letter of Recommendation for Mr. Nithin
Sylesh**

I take great pleasure in recommending Mr. Nithin Sylesh for the research internship programme into your prestigious Company. I've known him for approximately three years, when he enrolled at Amrita University in the Department of Artificial Intelligence Engineering as an undergraduate student in 2019. I've been his advisor since his first semester and will continue to be through his eighth semester. Nithin has maintained an amazing CGPA of 7.49 /10 during his four semesters at the university.

Nithin has done academic projects on machine learning and computer vision under my guidance. Over the span of this course and throughout these projects I was impressed by Nithin's hard work and determination to ensure the quality and timely submission of his projects in a elegant manner. Nithin's commitment to his project can be easily analyzed by the way he demonstrates his work. Nithin has also done various other academic projects on subjects like Formal Language and Automata, Data Structures and Analysis, Signal and Image Processing etc.

Nithin is an enthusiastic student who always welcomes constructive criticism and who always operates in an organized manner. He has submitted his assignments in the most optimized and neat way. He never hesitates to offer a helping hand to his colleague.

Nithin is a brilliant, analytical, and goal-oriented student, and I am confident that through this Internship programme at your Company, he will be able to fulfil his goals in his field of interest and that his potential will be encouraged. I definitely recommend Nithin for the research internship programme at your prestigious Company, based on his enthusiasm for learning, aptitude for research, and intellectual qualities.

Finally, I wish him the best of luck in his future ventures.

.Best Regards
